

My journey began with a deep empathy for human-centered design and accessibility. Evolving from Visual Design into a holistic UX/UI Product Designer — shaping end-to-end experiences. Managing multiple design systems for various platforms (mobile & web). Transforming complexity into simplicity through creativity, AI innovations, and strategic design thinking, while ensuring the result is visually appealing, highly functional, accessible, and meets both user needs and business objectives (B2B and B2C).

EXPERIENCE

IxDF | Research | AI Experience Product Design
Instructional / eLearning / Start-ups

| 03/2024 - Today

Sr UX UI Designer 'Game of Thrones
Warner Bros Discovery

| 08/2022 - 10/2023

Sr UX/UI Product Designer
eLearning - Hatch Early Child Education

| 04/2022 - 07/2022

UX/UI Product Designer
BlackBerry Cyber Security

| 01/2017 - 10/2021

UX/UI Design & Info Architecture
Scotia Bank

| 10/2016 - 12/2016

UX/UI Research | Visual Design & Video Editing
Compass Group
Mayo Clinic, TJX, Companies, Toronto Zoo

| 01/2016 - 04/2016

Interactive Digital Designer
2D Illustrator | 3D Design
Contract Projects - Design Agency
Media & TV | Events & Exhibitions | eCommerce & Retail

| 2010 - 2014

EDUCATION

B.DESIGN
3D MODELING & INTERIOR
ARCHITECTURE

MA HUMAN - INTERACTION
DESIGN
London Middlesex University

COURSES & TRAINING

LEADERSHIP

- AI-UX Management,
Design & Product Leadership
- IxDF - Interaction Design Foundation

PRODUCT & BUSINESS COURSES:

- Cyber Security
 - Data-Driven Product Research &
Design Thinking
 - Product Management for AI
- Udemy

ART DESIGN & ARCHITECTURE

- Design Thinking for UX Design Leaders
- Research & System Thinking for
Product Design
- Human Interaction, Consumer Behavior
Social Psychology
- Philosophy, History of Art Design &
Architecture
- Narrative, Cinema and Game Set Design

TECHNICAL COURSES:

- HTML/CSS, Markdown, CMS
 - Animation, Video and Effects
 - 3D Design Modeling & Rendering
- MDX University

VOLUNTEERING

Art Teacher Assistant
K-8 GRTW Academy, NJ, US

Photography & Videography
Tamarak Camp, NJ, US

Instructional Designer
UX/UI Course Development.
Sheridon College, ON, CA

Professor Assistant
Teaching Design Tools
London Middlesex University
London, UK

EXPERIENCE DESCRIPTION

IxDF | Research | AI Experience Product Design

Instructional / eLearning / Start-ups

| 03/2024 - Today

- **Design Consulting** - Collaborate with an early-stage startup to support hands-on Visual, UX Design & Research, contributing to product design from ideation to execution. Considering AI-driven workflows, and adaptive interfaces that optimize user interactions.
- **Instructional Design | Visual Communication & Design Thinking** - Create instructional content on visual communication, guiding creativity, design thinking processes, case studies, design systems, typography, color theory, and layout principles for students at various stages of their creative journey from diverse backgrounds and varying levels of expertise.
- **Researching & studying** the latest design trends & emerging technologies in Product Design, 3D AR/VR & Human-Computer Interaction (HCI & IxD). Exploring the fusion of physical and digital realms, conversational design, chatbots, adaptive interfaces with AI-driven experiences & the technical foundations as essential building blocks that connect design and AI prompt engineering.

| 08/2022 - 10/2023

Sr UX UI Designer - Game of Thrones

Warner Bros Discovery

- **Collaborate with cross-functional team members** like Product Managers, Researchers, Content Strategists, and Engineers to gather information, conduct competitor research & analyze user behavior and visual challenges. Understand the technical requirements and limitations, customers/stakeholders' needs, business requirements, and technologies. Use my design thinking to consider company values and find creative solutions that work, both for the product and the brand.
- **Applying human-centered design implementation** to focus on intuitive functionality and developing a unified Design System. Create components to ensure a cohesive & user-friendly experience throughout the product ecosystem. Produce user flows, info-architecture, wireframes, mockups, and prototypes to enhance overall user experience. Design user-friendly and visually appealing features and components that contribute to the product's improvement.
- **Document core functionality and guidelines recommendations** in Figma, Miro & Confluence for team reference. Establishing a shared understanding of design principles and guidelines, fostering an organized workflow for seamless integration across diverse teams.
- **Support the Engineering team** & test the implemented designs while ensuring user accessibility is maintained. Coordinate between teams, effectively bridging communication gaps and enhancing collaboration.
- **Participate in user testing sessions** to gather insights and leverage user feedback to enhance the design, integrating customer feedback into refinements that increase engagement and satisfaction
- **Project Management** - partner with Managers & Stakeholders to review project requests, and monitor design workload & progress. Balancing priorities across multiple initiatives to develop plans & action items for all design-related initiatives to ensure timely delivery and quality. Identify potential conflicts or challenges, & adjust workflows to maintain efficiency.

Sr UX/UI Product Designer

eLearning - Hatch Early Child Education

| 04/2022 - 07/2022

- Supporting the ongoing evolution and merger of multiple e-learning products into one Brand. Evolving design language and creating a Brand Identity & enhancing the user experience across all products to help create friendly interactions and intuitive experiences.
- Maintaining design system components to ensure consistency. Support discussions with engineering to ensure a common understanding of the outcomes. Sharing feedback and design recommendations to help create friendly interactions and intuitive experiences.

Sr UX/UI Product Designer

BlackBerry Cyber Security

| 01/2017 - 10/2021

- **Multichannel Collaboration** - Worked across different channels in the company: designing for IoT, Cybersecurity Privacy, Productivity, & Gamification. Navigated between business goals and technical constraints by proposing customer-driven alternatives backed by usability insights & stakeholder alignment.
- **Holistic Considerations for human factors, user research/ usability, and accessibility** throughout the design process. Creating user-centered & intuitive Design solutions to simplify complex data structures & optimize user workflows. Including responsive web & mobile (iOS/ Android) for customer-facing platforms and applications. Considering accessibility & ensuring a cohesive experience across various devices and platforms.
- **Ensuring a consistent & delightful user experience** while considering platform-specific design guidelines and maintaining a unified brand identity. Both iOS App & Android design, Mobile & Web pages, Forms, Coupons & Deals, Push Notification, Browser extension and more.
- **Leading a Design System** across all products & developed design system guidelines for accessibility and visual aesthetics in both dark & light backgrounds.
- **Conducting case studies & research** to address challenges related to dark & light theme usage.
- **Comprehensive Design considerations** from information architecture, user flows, wireframes, UI components, infographics, & data visualizations.
- **Conceptual Prototyping** - Collaborated with the innovation team to generate conceptual prototypes for new features and products.
- **Supporting the Engineering** team and ensuring effective implementation.
- **Visual Data Representation**: Collaborate with cybersecurity teams to translate data insights into visually compelling graphics. Design engaging and informative infographics and data visualizations to simplify complex concepts. Crafted a tailored experience for first-time users, including intro screens, empty-data visualization, iconography with a tutorial and helpful tool-tip system.
- **Brand Guidelines** - provided occasional support to the Brand team by contributing to product design guidelines and company branding materials.
- **Mentorship and Guidance** for junior colleagues - by understanding the design problems that need solving and offering Guidance & feedback to support their work.

EXPERIENCE DESCRIPTION

UX/UI Product Design & Architecture
Scotia Bank

| 10/2016 - 12/2016

Working part of the Universal Lab team- supporting Scotiabank’s mobile App. Designing wireframes and interactive prototypes for a facing iPad application that redefines the future of banking for self-service. Working part of the Universal Lab team. Designing wireframes and interactive prototypes for a facing iPad application that redefines the future of banking for self-service. Using research-informed information, architecture & interaction patterns to simplify complex workflows with a focus on product growth, customer registration, account management & subscriptions.

UX/UI Research | Visual Design & Video Editing
Compass Group
Mayo Clinic, TJX, Companies, Toronto Zoo

| 01/2016 - 04/2016

Collaborate with business team members to define requirements and establish user goals, objectives, and success metrics to ensure product success. Design user-centered experiences through usability research and design thinking for mobile, tablet, web, and kiosk platforms. Include journey maps, personas, wireframes, UI elements, illustrations, iconography, and interactive kiosks. Occasionally assisting with video and sound editing for promos. Collaboration with engineering teams to understand the technical constraints. With exposure to Agile methodologies.

Interactive Digital Designer
2D Illustrator | 3D Design
Contract Projects - Design Agency
Media & TV | Events & Exhibitions | eCommerce & Retail

| 2010 - 2014

- Worked within a Design Agency, Photography & Exhibition Design Studio, with international clients across Europe and North America.
- Designed projects across all areas of communications: Print, Web, Online, 3D & 2D graphics.
- I managed more than one design brief at a time, finding creative solutions with designs that communicated with the target audience and the brand’s guidelines.
- Worked within a team, generating ideas, including copywriters, photographers, creative directors, print departments, developers, and producers. Creating well-rounded designs that match everybody’s high standards of both clients and internal stakeholders.
- Assisted the producer with video editing and effects. Maintaining and developing conceptual designs for video and broadcast, set design and backgrounds.
- Designed digital assets like web pages, banners, newsletters, icons, visual navigation and other online graphics and illustrations.
- Considered localization for different cultures, including a copy that was translated and published in more than 22 languages worldwide.

Achievements: While contributing to the design of an exhibition for Outsmart Telecom Corporation, working closely with the client. Our project was selected through a public competition and was built for the 3GSM Mobile World Congress Exhibition in Barcelona (2009).
